

Backup Your Business Critical Data at the Touch of a Button.

Introduction.

Our IT Department's Online Backup solution can guarantee business continuity by taking a regular, secure and reliable backup of all your business-critical data. Our data backup service can be used for backing up all aspects of your business data including data kept on servers, workstations, laptops and external storage devices.

- **Are you confident that your organisation would survive a major data loss?**
- **Is it worth risking your entire business by using a traditional backup solution?**

The truthful answer to the above questions for most business owners would be **No**. Losing a week of business critical data would have a devastating impact on your organisation, so just imagine if you lost **EVERYTHING**.

Don't risk the future of your business. Make the change to Online Backup **TODAY**.

Protect your business with an Online backup Solution.

How Does Online Backup Work?

Our flexible Online Backup software will let you decide what data gets backed up. With our easy to use client interface, you can choose the following;

- Which system files, folders and directories you wish to back up.
- The time you would like the backup to commence.
- Detail how many backups you would like.
- Choose how long you want to keep the backups.
- Restore any data backed up with one click of a button, quickly and securely.
- Back up your Microsoft Exchange Email store and specialist SQL databases.

Take the worry out of data backup.

Your selected data will be backed up daily in the background by our online backup platform. When your backup is completed, You will receive a confirmation email detailing what information has been backed up. All data is securely transferred using 128 SSL encryption.

What are the advantages of using an Online Backup Solution?

- No dependence on staff to change the backup tapes.
- No need to worry about fire, theft and data corruption.
- No limit to the amount of data you can backup
- 100% secure. We use 256 bit encryption when backing up your data.
- All data is stored at our high security data centers based in the UK.
- All data is replicated in a multi-tier environment ensuring NO data loss will occur.

Online Backup is affordable.

Securing your data doesn't have to be expensive. Whatever backup size you require, Our IT Department can provide you with a cost effective alternative to your traditional ailing backup solution.

Free 30 day trial.

Take advantage of a free trial and find out just how good our Online Backup service is. Call us today and a member of our team will setup a full 30 day, 100 Meg trial for your business.
