# Implement a High Quality, Resilient Virtual Infrastructure.

## Overview.

Our IT Department are experienced in every aspect of VMware technologies, from the integration of VMware with your existing network to in-house training for IT Managers. Whatever your requirements, our solutions can help improve your existing IT Network by integrating our Virtualisation methodologies.

By implementing a virtual infrastructure, you get higher availability of resources, better desktop management, increased security and a better disaster recovery processes. You can also expect lower energy costs as well as reduced capital costs.

## Why implement a virtual infrastructure?

- Increase operational efficiency within the workplace.
- Lower your hardware and maintenance costs.
- Create a more robust and efficient infrastructure.
- Consolidate your servers to a ratio of 4 Operating Systems per CPU.

## What Consultation services do we offer?

Our IT Department offer a comprehensive portfolio of implementation and support services. These include;

- Presales advice on the best VMware solution for your business.
- A full demonstration of our virtual solutions.
- System design and proof of concept by our technical consultants.
- In-house and remote support for your chosen VMware services.
